Advent of Code, Codewars

## PROFILE

Web developer with a passion for creativity and working with the latest technologies available. I am adept in all stages of web design and development. Have a good knowledge and experience in user interface, responsive web design, producing high quality and well tested code.

## EMPLOYMENT HISTORY

### Web Designer/Developer/Creator, Freelance

Manchester

Mar 2017 — Present

<http://thetadas.co.uk/>

Modern & responsive personal website built using React, React Icons, useState Hook, CSS3, Node.js, npm, multiple contact options (email, messenger & whatsapp)

<https://dribbble.com/Tadzyla>

Examples of work for UI/UX design using latest tools Figma & Canva

<https://roversfrommars.herokuapp.com/>

Web app bootstrapped using Create React App, which is a perfect generator for building this projects functionality and interface. Data is fetched using custom React hook "useFetch", which extracts photos and data from NASA API. To display photos I use Image List component from Material UI, which shows a collection of images in an organised grid.

[https://tadzyla.github.io/project\\_movie\\_fights/](https://tadzyla.github.io/project_movie_fights/)

Movie comparison web app built with JavaScript, Axios and API. User can search for a movie on left and right side of the page.

All statistics about the movie is extracted from OMDB API and two movies are compared between each other, highlighting higher stat numbers in "green" colour.

[https://github.com/tadzyla/crime\\_display\\_service](https://github.com/tadzyla/crime_display_service)

Web app extracting data from Police API in UK (<https://data.police.uk/docs/>). Data is sorted by police forces and date(Year-month).

For this project I used React library with Axios to get data from API. Chart is displayed using React wrapper for Chartjs library.

<https://www.etsy.com/uk/shop/TadasPhotographyShop>

<https://www.etsy.com/uk/shop/TadaaDesignStudio>

Creation of digital products and listing on Etsy platform.

Digital products created using tools like Canva, Figma, and Adobe Photoshop.

## Production Operative, Landis & Gyr

Stockport

Oct 2010 — Oct 2020
